

## NORTH FRONT RANGE WATER QUALITY PLANNING ASSOCIATION 257 Johnstown Center Dr.; Unit 206 Johnstown, CO 80534

970-587-8872 - http://www.nfrwqpa.org

## 208 Areawide Water Quality Management Plan Amendment Consolidation of Treatment Operations

(60-Day Public Notice Required)

To meet the plan amendments minimum requirements, all items are required and must be included to be accepted for review

and considered for approv	val. Submitted references to o	ther materials is not acceptable, i.	e., refer to, or see

	nicipality.					
	urrent WWTF Process Overview,					
The	applicant shall provide the currer	it WWTF process with a brief r	narrative	and flow schematic.		

L. Modifications and Construction
Description of proposed modifications and construction due to either the capacity increase or decrease.
N. Carifal Improvements Cabadula
M. Capital Improvements Schedule
Capital improvements implementation plan and schedule, including the estimated construction time and the estimated date upon which the modified plant will be in operation.
N. Management Capabilities - Intergovernmental Agreement(s) (IGAs), Appendix I.
Management capabilities for controlling the wastewater loadings within the proposed treatment works' capacity limitations, i.e., user contracts, operating agreements, pretreatment requirements, and/or the management capabilities to expand the facilities as needed (subject to the appropriate, future review and decision procedures). Include intergovernmental agency agreement(s) with agencies agreeing to the New WWTF, including collection systems to be served by the New WWTF, and capacity sharing agreements. Including contracts to pay for acceptable waste treatment. IGAs may be simple nonlegal agreements that document agencies agree to the New WWTF, or agree to be served by the New WWTF. These IGAs ensure long term 208 planning collaboration between agencies concerning WUSA boundaries and consolidation WWTFs (5-mile radius).
O. Responsible Parties
What Agency or entity is financially responsible for the construction of the WWTF capacity increase or decrease?
What Agency or entity has the financial responsibility for owning and long-term operating expense of the new WWTF?
What Agency or entity has the financial responsibility for managing and operating expense of the WWTF?
P. Provide changes in the currently approved Utility Plan financial budget, Appendix J
Provide changes in the currently approved Utility Plan financial budget that will result from the proposed increase or decrease in the design capacity, including changes to the fee structure. Provide a 20-year financial budget developed to provide for necessary capital and continued operation, maintenance, capital improvement projects, and replacement through the life of the project. This would include, for example, anticipated annual budget and the fee and rate structure. This section would include the current or proposed sewer rates, sewer tap fees, and projected rate or fee increases over the 20 years.
Q. 208 Areawide Water Quality Management Plan Considerations.
For the amendment projects increasing or decreasing the design capacity of a WWTF in the region, indicate how this project aligns with the Association's current 208 Areawide Water Quality Management Plan to ensure present and future wastewater needs are met economically and with a focus on protecting, maintaining, or restoring water quality.
