NORTH FRONT RANGE WATER QUALITY PLANNING ASSOCIATION 257 Johnstown Center Dr.; Unit 206 Johnstown, CO 80534 970-587-8872 - http://www.nfrwqpa.org

208 Areawide Water Quality Management Plan Amendment New Wastewater Treatment Facility (60-Day Public Notice Required)

To meet the plan amendments minimum requirements, all items are required and must be included to be accepted for review

and considered for approval. Submitted references to other materials is not acceptable, i.e., refer to.., or see..

	decisions, including the	reasons for or against,	with letters signed b	by the involved	agencies'
Confirm regional consolidation decisions, including the reasons for or against, with letters signed by the involved agencies' decision-making authorities. IGAs, letters, or meeting minutes should identify legally responsible personnel with decision-making					
authority (i.e., mayor, president/chair of the council/board, town or city council/board, public works director, owner, corporate					
officer, other authorized officials, etc.) with the business, organization, or municipality. J. Floodplain (FEMA) or other natural Hazards, Appendix H.					
Is the proposed WWTF in a 100-year floodplain or other natural hazard areas? Evidence that the proposed site and facility					
operations will not be adversely affected by floodplain or other natural hazards. Where such hazards are identified at the					
selected site, the report shall describe means of mitigating the hazard.					

NFRWQPA Plan Amendment-New WWTF-FINAL - FINAL 2024 Protected.docx

K. Evaluation of Alternative Site Locations and treatment technology alternatives, Appendix I.

Detailed description of selected alternatives including various sites, the legal description of the location of the proposed treatment works, treatment system description, design capacities, and operational staffing needs.

L. Land Ownership, Appendix J.

Legal arrangements showing control of the site for the project life or showing the ability of the entity to acquire the site and use it for the project life.

M. Management Capabilities - Intergovernmental Agreement(s) (IGAs), Appendix K.

Management capabilities for controlling the wastewater loadings within the proposed treatment works' capacity limitations, i.e., user contracts, operating agreements, pretreatment requirements, and/or the management capabilities to expand the facilities as needed (subject to the appropriate, future review and decision procedures).

Include intergovernmental agency agreement(s) with agencies agreeing to the New WWTF, including collection systems to be served by the New WWTF, and capacity sharing agreements. Including contracts to pay for acceptable waste treatment. IGAs may be simple nonlegal agreements that document agencies agree to the New WWTF, or agree to be served by the New WWTF. These IGAs ensure long term 208 planning collaboration between agencies concerning WUSA boundaries and consolidation WWTFs (5-mile radius).

N. Financial 20-Year Capabilities, Appendix L.

Provide a 20-year financial budget developed to provide necessary capital and continued operation, maintenance, capital improvement projects, and replacement through the life of the project. This would include, for example, anticipated annual budget and the fee and rate structure. This section would include the current or proposed sewer rates, sewer tap fees, and projected rate or fee increases over 20 years.

O. Capital Improvements Schedule

Capital improvements schedule and implementation plan and schedule including estimated construction time and estimated startup date.

P. Emergency Operations Plan, Appendix M.

Demonstration of the owner's capability to operate and maintain the facility, which shall include an emergency operations plan. The emergency operations plan shall outline procedures to minimize the possibility of sanitary sewer overflows and health hazards to the public and operations personnel. The emergency operations plan shall include information on, but not be limited to telemetry, backup power supply identification, portable emergency pumping equipment, emergency storage/overflow protection, and operator emergency response time.

Q. Right of Way Easements, Appendix N.

Where the site application indicates that the proposed domestic wastewater treatment works will discharge treated effluent to a ditch or other manmade conveyance structure, or that an easement, right-of-way or other access onto or across private property of another person may be necessary to construct the facility or to effectuate the discharge, the applicant shall furnish to the NFRWQPA evidence that a notice of the intent to construct a new domestic wastewater treatment works has been provided to the owner of such private property.

R. Shared Capacity Agreements, Appendix O. Where capacity in a domestic wastewater treatment works is shared between two or more entities, the entities must have entered into a capacity sharing agreement. The capacity sharing agreement must include terms that define that allocation of the treatment works amongst the parties and terms for initiating expansion of capacity and provisions for design capacity changes (increase or decrease). A draft of the agreement must be submitted with the site location application and a final approved version must be submitted with the design.
S. Responsible Parties
What agency or entity is financially responsible for the construction of the new WWTF?
What agency or entity has the financial responsibility for owning and long-term operating expense of the new WWTF?
What agency or entity has the financial responsibility for managing and operating expense of the new WWTF?
T. New WWTF Funding sources
The applicant shall state whether the project is self-funded or Funding from sources such as the Revolving Loan Fund and/or Department of Local Affairs.
U. Current and proposed land use and zoning of project site and WUSA, Appendix P. The Applicant must demonstrate that the WWTF project site's current and/or future land use and zoning is approved. For support of the WUSA and WWTF loading projections also provide the WUSA land use and zoning maps. Please attach a map of the current and or proposed land use zoning maps. 1. USGS' National Land Cover Dataset (NLCD, http://www.mrlc.gov/) 2. USDA's National Agricultural Statistics Service (NASS, http://www.nass.usda.gov/
 Colorado State University WRAP tool (<u>https://erams.com/catena/tools/colorado-collaborative/watershed-assessment/</u>) under the "Land Surface" data category for any area of interest across the country County and city land and zoning maps.
V. Collection System Requirements; sizing, type, and staging, including needed lift stations, if any, Appendix Q.
The applicant must provide the collection system requirements, sizing, pipe type, and staging, including any lift stations, needed to be constructed to serve the WWTF. Please attach a map of the current and or proposed collection system maps.
W. Collection System Inflow & Infiltration, if collection system already exists.
a) Please identify the current WUSA Inflow & Infiltration. I&I estimates should be included within the design flow of the proposed WWTF, and unsupported I&I should be at least 10% of the design flow of the WWTF.

NFRWQPA Plan Amendment-New WWTF-FINAL - FINAL 2024 Protected.docx

b) Is the Inflow & Infiltration considered excessive? Illustrating what portion of the daily flow basis per capita per day (gpcd) is I&I and what part is attributed to calculated or anticipated wastewater flows.				
NOTE: The EPA guideline for potentially excessive l&I on an average daily flow basis is 120 gallons inflow is considered to be excessive (EPA, May 1985). The above l&I EPA numbers cited a <u>Regulation No. 22 - Site Location and Design Regulations for Domestic Wastewater Treatn</u> the average daily flow. <u>https://cdphe.stg.colorado.gov/water-quality/regulations-policie</u>	bove historically have been nent Works (5 CCR 1002-22)	used for grants and loar denotes unsupported l&	ns and are outdated. CW	1-14 Implementation Policy
X. Funding Process.				
Will the State Revolving Fund (SRF) loan program be used to finance any portion of the project?	Yes:	No:	If yes, please list project number.	
Is the project self-funded?	Yes:	No:
