Subject: DRAFT Submittal of Wastewater Joint Utility Plan Final Report – The Saddler Ridge Metropolitan District and The Town of Severance, Severance, Colorado
Project No.: 3953.002(18)

Dear Mr. Crowley:

Stewart Environmental Consultants, Inc. is pleased to provide to the Utility Planning Committee of the North Front Range Water Quality Planning Association (NFRWQPA) the enclosed Submittal of the Wastewater Joint Utility Plan Final Report for The Saddler Ridge Metropolitan District and The Town of Severance, Severance, Colorado. We are submitting this Joint Utility Plan (JUP) as a condition of the Wastewater Utility Plan Final Report for Saddler Ridge Metropolitan District Water Reclamation Facility, Severance, Colorado that gained approval in December 2008.

This submittal follows the NFRWQPA Wastewater Utility Plan checklist and is intended to provide a sanitary sewer planning framework for the Town of Severance and the Saddler Ridge Metropolitan District, anticipating growth and development needs over the next 20 years.

The JUP describes the service areas, the wastewater characteristics, the flows and loadings to be expected, an analysis of alternatives considered, and the institutional arrangements and management capabilities for the long-term operations and maintenance of the Saddler Ridge Metropolitan District Water Reclamation Facility. The JUP will address infrastructure needs and capital improvements required to meet the phased development pressure within the Town of Severance's boundaries in a manner that provides for cost efficiencies and flexibility.

If the committee has any questions regarding this submittal, please contact me to set up a meeting to discuss them.

Sincerely,

STEWART ENVIRONMENTAL CONSULTANTS, INC.

David R. Stewart, PhD, PE
President and CEO
